READING EXERCISE

Read the passage below and choose the correct answers.

Safety during an earthquake

An earthquake is a weak to strong shaking of the ground made by a sudden movement of rock materials below the earth's surface. In case of an earthquake, take cover immediately and move to a safer place. Do not go out until the shaking stops.

If you are indoors, take cover under a table or bed to prevent getting hit by falling objects. If you are outdoors, go to an open area, away from buildings, trees and power lines. In case you are in a moving vehicle, stop your vehicle at a safe place and avoid going onto bridges because they could collapse. Stay inside the car and listen to the radio for emergency announcements.

In addition, avoid windows, as they could shatter. If you are inside an elevator, press every button and get out immediately, as the power could go off. After an earthquake, check yourself and others for injuries. Listen to the official announcement and stay away from damaged areas.

1 Earthquake is _____.

A a sudden shaking of the ground

B a long and high sea wave

C a strong circular storm

2 You are in your bedroom and there is an earthquake. What must you do?
