

Emergency Response Team Simulation

1 Set the scene (5 minutes)

Show pictures or short video clips of emergencies (Examples: fire, flood, accident).

Ask:

- 'What should you do if you see smoke?'
- 'Who will you call in an emergency?'

2 Form teams (5 minutes)

Divide pupils into small groups (4–5 pupils each). Assign each group one emergency scenario:

- Group 1: Fire in the school canteen
- Group 2: Flood near the school field
- Group 3: Car accident outside the school gate
- Group 4: Pupil fainting in class
- Group 5: Small fire in the science laboratory

3 Group task (15 minutes)

Each team discusses and prepares:

- What actions would they take?
- Who will call for help and what will they say?
- What tools or items will they use (Examples: phone, water, blanket)?
- How can they keep everyone safe?

They must write their emergency plan in a mind map.

4 Presentation (10 minutes)

Each group presents their emergency plan or acts it out in a short role-play (Duration: 2–3 minutes). Encourage them to use clear communication, make eye contact and use an expressive voice.

5 Reflection (5 minutes)

Ask pupils:

- 'What did you learn about working as a team?'
- 'How can you help others during real emergencies?'
